

# TaxFinder

Active analysis of tax changes  
in official gazettes

# Businesses invest **too much time and resources** to stay informed about fiscal updates

Managing tax updates is a challenge.

The sheer volume of regulations, their multiple levels, and frequent changes make it difficult to stay up-to-date:

## 01 **Multi-level regulations:**

Tax regulations originate at five different levels:

European Union | National | Regional | Provincial | Local

## 02 **Constant updates:**

Regulations change frequently, requiring daily monitoring to avoid missing critical updates.

## **Regulatory complexity:**

03 The vast amount of data and technical details make identifying relevant regulations, tax benefits, and subsidies a complex and demanding task.

# Streamline the tax change review process with TaxFinder

TaxFinder automates the early detection of changes in taxes and subsidies by analyzing official gazettes at the European Union, national, regional, provincial, and local levels.

Using advanced AI models, it classifies information and evaluates its potential fiscal impact, transforming a manual process into an automated, accurate, and efficient workflow.

# Analysis that **makes a difference** in tax change reviews

## 01 Automatic data extraction

- Daily downloads of the main official gazettes, including the BOE (Official State Gazette), Regional, Provincial, and European Union gazettes.
- Available: European Union, Regional [Galicia, Catalonia, Basque Country, Castilla-La Mancha], and Provincial [A Coruña, Tarragona, Bizkaia, Ciudad Real, and Murcia].
- In progress: Community of Madrid and Congress of Deputies.

## 02 AI-NLP-powered analytical model

- Classifies relevant regulations using algorithms with client-defined keywords.
- Generates automatic summaries with analyzed fiscal impacts.

## 03 Clear and detailed visualization

- Dashboards that facilitate visual analysis, from general overviews to specific regulations with high impact.

# Simplifying repetitive processes is the first step to unleashing talent

90%

of savings in time spent reviewing gazettes, identifying, and classifying tax updates.

---

70%

of efficiency in reviewing and managing tax updates and regulatory changes.

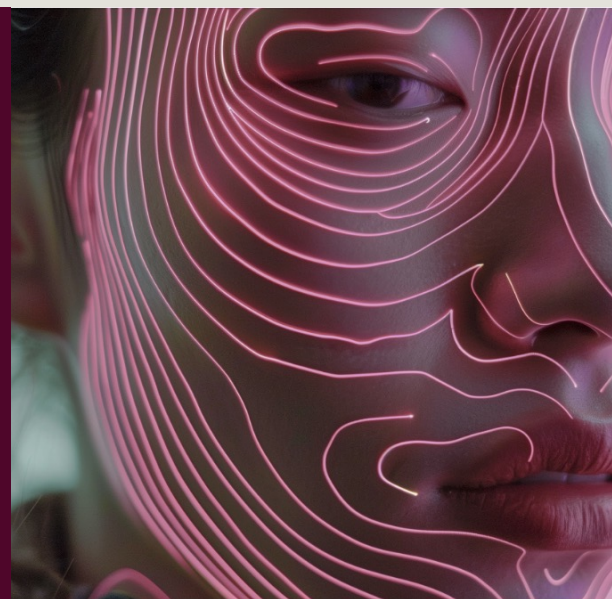

---

one

interface to manage tax updates.

---

With Minsait and the TaxFinder solution, powered by SAP technology, simplify tax management and turn fiscal complexity into opportunities for your business.

# Tech for impact

We connect talent,  
technology, and business  
to drive growth and  
create positive,  
sustainable impact.
