aiDOCS

An intelligent solution for Document Management

It improves document management by making it more efficient, secure, and accessible, reducing operational costs and optimizing information usage.

Organizations face multiple challenges in modern document management due to digitalization, the exponential growth of information, and the need to comply with strict regulations.

aiDOCS helps reduce the time spent on repetitive tasks such as classification, indexing, and document searching.

aiDOCS aiDOCS is the solution for automating Document Management.

Boost your document management with AI.

Automate classification, metadata extraction, and searches with an intelligent conversational assistant.

01
Automate document processes

Automates classification, metadata extraction, and document searches with a conversational assistant that responds in natural language.

02
For all users

For all users in the organization, from salespeople to technicians, for any document-intensive business process.

03
Flexible deployment model

Optimizes deployment without costly integrations: embed it in an iframe or link, or install it as a standalone app.

04
Deployment and integration

Deploys in AI Core SAP or On-Premise. Compatible with generative AI models and any document management system.

aiDOCS, a single system for multiple applications

Processes structured documents (IDs, etc.), analyzes textless images, and reads and classifies handwritten text.
