

MINSAIT, RECOGNIZED BY SYMANTEC AS BEST CYBERSECURITY TEAM OF THE YEAR

- **This award acknowledges the high specialization level of Minsait's cybersecurity experts and the quality of its solutions**
- **Indra's digital transformation unit uses Symantec technology for protection from advanced threats for the companies and organizations for which it provides services**
- **Over half of the cybersecurity incidents in Spain are related with the infection of equipment with malware, a type of attack that generates elevated economic losses and damage to prestige alike**
- **Minsait counts with a global network of Advanced Cybersecurity Operations Centers (i-CSOC) from which it offers its clients an integrated cybersecurity service**

Madrid, November 13, 2017.- Minsait, the Indra business unit set up to address the challenges posed to its clients by digital transformation, has been awarded by Symantec as partner with the best technical team of the year, a recognition for the high level of specialization, experience and quality of its professionals and their proven, accredited capacity in cybersecurity solutions.

This Indra unit uses Symantec technology to provide protection services, like secure browsing, and for protecting clients' access to applications and services in the cloud. Minsait minimizes this vector of attack and prevents that accidentally downloaded malware may spark data losses or interruptions to the operations of companies and organizations. Over half of the cybersecurity incidents registered in Spain are related with these types of attacks, which generate elevated economic losses and damage the prestige of a company or institution.

Minsait offers this service in a flexible, pay-per-use mode that is adapted to each client's specific needs. Its international network of Advanced Cybersecurity Operations Centers (i-CSOC) enables it to offer a global coverage 24x7, 365 days per year, anywhere worldwide.

In addition to its Cloud secure browsing and protection services, Minsait provides through its network of i-CSOC centers an integral security service that supervises all of the environments of companies and institutions to minimize the exposure of their assets to an attack and the risk of suffering a security incident. All of the services necessary to guarantee compliance with market standards and regulations, like the EU general data protection (GDPR), are also provided.

Minsait counts with a team of more than 200 cybersecurity professionals providing organizations ongoing support. Furthermore, it counts with a fast intervention team in charge of implementing action in the event of a crisis situation, or if a client suffers an attack, for purposes of ensuring continuity or reestablishing operations.

Minsait maintains permanent contact with the leading manufacturers of Cybersecurity software and technologies, like Symantec, and with leading institutions and public bodies of the sector. Therefore, it has a thorough and ongoing vision of the existing risk level at any given time, and immediately detects cyberthreats when they arise. This capacitates it to recommend its clients the most efficient measures for protection at any given moment.

About Minsait

Minsait (www.minsait.com) is the Indra business unit that tackles the challenges posed by digital transformation to companies and institutions. Its offer is focused on achieving immediate and tangible results. Indra has grouped its entire digital business technology and consulting solutions under Minsait, which has

established itself as one of the leading companies in said market in Spain. Minsait is characterized for its differential methodology, a broad portfolio of business solutions, a proprietary and unique sales model, delivery and support aimed at impact generation, and a flexible organization based on multidisciplinary teams, comprised of specialists with very specific profiles. Minsait completes Indra's existing offering of high-value vertical products, helping to orientate all services to cater to clients' key business needs, and thus becoming a driving force behind their growth.

About Indra

Indra is one of the main global consulting and technology companies, the top IT firm in Spain, and the technology partner for the core operations of its clients businesses worldwide. It offers a comprehensive range of proprietary solutions and cutting-edge services with a high added value in technology, which adds to a unique culture that is reliable, flexible and adaptable to its clients' needs. Indra is a world leader in the development of end-to-end technology solutions in fields such as Defense & Security, Transport & Traffic, Energy & Industry, Telecommunications & Media, Financial Services, Electoral Processes, and Public Administrations & Healthcare. Through its Minsait unit, it addresses the challenges of digital transformation. In 2016 Indra posted revenues of €2,709m and had a workforce of 34,000 professionals, a local presence in 46 countries, and sales operations in more than 140 countries. Following its acquisition of Tecnocom, Indra's combined revenues amounted to more than €3,200m in 2016 with a team of nearly 40,000 professionals.
